Handwashing

Children share many items throughout the school day and at home including books, puzzles, computers, water bottles and sports equipment. Sharing can spread germs that can cause sickness, especially during cold and flu season. Correct handwashing is the best way to prevent the spread of infection.

To help keep the people in your home healthy, follow these simple steps:

- Encourage children to sneeze into the bend of their arm rather than into their hands
- Make time for handwashing, especially before eating, after using the bathroom, blowing your nose, sneezing, handling garbage, touching animals, playing outdoors or visiting someone who is sick

- Wash your hands whenever they look or feel dirty
